DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Marque-Pucheu (US 5,509,028, submitted by Applicant).

Consider claims 1 and 5. Marque-Pucheu discloses a communication apparatus (14, 24) for converting the frequency of a received signal from a plurality of handsets (6) and retransmitting the signals, comprising “a whole spectrum inverter” (transposition means 26,27) that inverts the spectrum of the received signals before retransmitting the signals. See col. 4, lines 21-22.

Regarding claim 2, though not shown, a bandpass filter is required for transmitting a band limited signal. See col. 3, lines 36-43.

3. Claims 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Taguchi (US 4,817,141).

Referring to Fig. 15 at col. 11, lines 29-40, Taguchi describes a notorious well know signal processing technique of “a frequency inversion” (also known as folding or reversal) method and apparatus, comprising the steps of:

- 1) sampling a signal to produce sampled data, i.e., at a sampling frequency of 8Khz.

Art Unit: 2634

2) converting the sampling rate to 2 Khz (as claimed in claim 8), or decimating the sample data at 2 Khz (as claimed in claim 9) or “setting part of the sampled data obtained by the sampling to zero” (as claimed in claim 10).

3) using a low pass filter to extract the “inverted” spectrum, indicated by P. Note that a low pass filter is a kind of band pass filter in that it passes a band of frequencies located on the lower end of spectrum.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taguchi (US 4,817,141).

Taguchi discloses all the subject matter claimed except for “a program for executing the frequency spectrum method according to Claim 8.” However, it is well known to perform

sampling, decimating and filtering by use a stored computer program. Thus, it would have been obvious to one skilled in the art to perform the steps of frequency spectrum "inversion" as explained in the above paragraph since the program may be conveniently modified to meet any changes in the communication design.

Allowable Subject Matter

7. Claims 3,4,6, and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
